Disclaimer (US)

This section uses platform tools to demonstrate how traders can research volatility patterns. All examples shown are for educational purposes only and should not be taken as trading or investment advice.

The content of this section is designed solely for informational and demonstration purposes regarding options. All cited examples are hypothetical, are not intended to represent any form of investment advice, and should not be considered a guarantee of investment returns. The case studies are to be used exclusively for educational illustration and are not a recommendation directed at any individual investor. They should not be regarded as specific investment guidance.

Options trading entails significant risk and is not appropriate for all customers. It is important that investors read [Characteristics and Risks of Standardized Options](https://j.moomoo.com/017y9J) (<https://j.moomoo.com/017y9J>) before engaging in any options trading strategies. Options transactions are often complex and may involve the potential of losing the entire investment in a relatively short period of time. Certain complex options strategies carry additional risk, including the potential for losses that may exceed the original investment amount. Supporting documentation for any claims, if applicable, will be furnished upon request.

Options trading subject to eligibility requirements. Strategies available will depend on options level approved.

Moomoo does not guarantee favorable investment outcomes. The past performance of a security or financial product does not guarantee future results or returns. Customers should consider their investment objectives and risks carefully before investing in options. Because of the importance of tax considerations to all options transactions, the customer considering options should consult their tax advisor as to how taxes affect the outcome of each options strategy

Past performance is no guarantee of future results.

Investors are advised to read and understand the contents of the relevant disclosure documents before investing. Investors should understand the risks involved in relation to the products and services, conduct their own risk assessment and seek professional advice, where necessary. Investors should compare and consider the fee, charges and costs involved.

Mid-Week Options – What & Why?

Premium Edge & Settlement Trap

Options Upgrade:

Mon & Wed Expirations Added More 0DTE on Big Tech and Bitcoin ETF

Starting Jan 26, Nasdaq ISE adds Monday & Wednesday expirations for 9 major tickers, including Mag 7 plus AVGO and IBIT, which are the first Qualified Securities approved for the Short Term Option Series Program in Q1 2026.

Ticker	Security Name	Earnings Date (Excluded)
 AAPL	Apple	Thu Jan 29, 2026
 AMZN	Amazon	Thu Feb 5, 2026
 AVGO	Broadcom	TBD (Est. Early Mar)
 GOOGL	Alphabet	Wed Feb 4, 2026
 IBIT	iShares Bitcoin Trust	N/A
 META	Meta Platforms	Wed Jan 28, 2026
 MSFT	Microsoft	Wed Jan 28, 2026
 NVDA	NVIDIA	Wed Feb 25, 2026
 TSLA	Tesla	Wed Jan 28, 2026

Note: To mitigate settlement risk and liquidity concerns, exchanges may omit listing Short Term Option Series on dates that coincide with a company's earnings release.

What is Midweek Options?

Mondays & Wednesdays Expiration

- Previously only available for major index options like SPY, QQQ, IWM
- Options trading volume reached record highs each year for past 6 years
- Introduced to 'Qualifying Securities' that meet NASDAQ criteria, ie:
 - Stocks - Market cap greater than \$700b
 - ETFs - AUM greater than \$50b
 - Monthly options volume - 10m contracts
- Starting 26 January 2026: Mag7 and IBIT

Why Midweek Options?

- Precise tools to manage short term risk
- Greater flexibility for market participants to hedge or trade
- More options to choose between index and stock options

Mag7/IBIT vs 0DTE SPX Mid-Week Options

Feature	0DTE SPX (Index)	Midweek Mag7 & IBIT

Image provided are not current and any securities are shown for illustrative purposes only and is not a recommendation.

Premium per Day Definition = Premium Amount / Days to Expiration (DTE)

Key Findings:

Monday Options:

- Better **premium savings (~20%)** = buyer's advantage
- Same exposure = **lower cost of participation** compared to Fridays
- Lower IV % = ideal for hedging weekend gaps or buying options for directional trade

Wednesday Options:

- Better **premium bonuses (~9-19%)** = seller's advantage
- Mon-Wed sprint** = optimal 48 hours window for **theta decay (income)** when there's no earnings day risk

Comparing Mag7, IBIT and ETF Options

- Mag7 midweek options

- (a) **25% cheaper:** Lower 'barrier to entry' vs traditional SPY/QQQ options

- (b) **Fractional capital:** Underlying stocks (especially NVDA, AMZN, AAPL) are **~6x cheaper than indices, significantly reducing assignment risk/capital requirements.**

- (c) **Premium advantage:** Mag7 Wednesday options **premium outperform** ETF options for sellers, while Monday **premium savings are a tie** for ETF options buyers

- **Bitcoin ETF IBIT** offers the **cheapest premium to buy** because the underlying is much lower than other asset class

Future Observations

- **Liquidity:** More time is required to watch the volume and open interest of each strike price as **bid-ask spread ATM** seems stable for execution

The MAG7 Through an Options Lens
In MooSummit: Options Explained, Alwin's session was all about the MAG7 and how options traders can approach them thoughtfully.
The Magnificent 7 have become a focal point in today's market — not just because of their size, but because of how consistently they influence price action. Collectively, they make up around...
